Education

University of Wisconsin, Madison, WI

In progress

Doctor of Philosophy (Ph.D.), Genetics

Advisor: Cameron Currie, Ph.D.

Harvard University Extension, Cambridge, MA

03/2015

Master of Liberal Arts (ALM), Biotechnology – Bioengineering & Nanotechnology

Advisor: Tomás Maira-Litrán, Pharm.D., Ph.D.

Thesis: Transposon-Directed Insertion Site Sequencing for Determination of Fitness Factors in Pulmonary Infection by *Acinetobacter baumannii*.

Rensselaer Polytechnic Institute, Troy, NY

12/2010

Bachelor of Science, Molecular Biology & Bioinformatics

Research Experience

Currie Lab, University of Wisconsin-Madison

08/2015–present

Graduate Research Assistant

Madison, WI

- Built genomics-driven computational and analytical pipelines to uncover novel therapeutics and biosynthesis in free-living and host-associated actinomycetes.

Johnson Biosignatures Lab, Harvard & Georgetown Universities

10/2013–present

Lead Computational Biologist

Washington, DC

- Performed whole genome sequencing and metagenomic analysis of environmental samples from sulfur-rich, extreme environments with implications in microbial ecology, biogeochemistry, and exobiology.
- Characterized biosynthetic potential of metagenomic data.

Warp Drive Bio

04/2013–08/2015

Head of Experimental Genomics, (04/2014–08/2015)

Cambridge, MA

Research Associate, Experimental Genomics & Computational Biology, (04/2013–03/2014)

- Executed genomic-directed natural products drug discovery, high throughput Next Generation Sequencing (htNGS), computational biology, and molecular biology of actinomycetes and fungi.
- Designed and implemented genomic natural products searches over various scaffolds of business development and internal interest.
- Developed and curated computational pipelines and databases for assembly, annotation, and custom analysis of public and internal htNGS data (1.6×10^5 bacterial genomes, >150 closed and complete genomes) for analysis of novel polyketide, non-ribosomal peptide, and other natural product classes.
- Handled processing and management of sequence data, predictions, and analyses supporting multiple projects across discovery, molecular biology, engineering, and synthetic biology.
- Executed elucidation and prediction of novel chemical products of bacterial biosynthetic gene clusters and metabolic pathways (e.g. beta-lactams, aminoglycosides, rapamycin analogues, etc.).
- Developed internal pipelines for applied phylogenomic annotations and prioritizations of multiple data types to inform discovery and engineering efforts.
- Oversaw all lab and experimental support of actinomycete and fungal sequencing efforts for Illumina, Pacific Biosciences, and Oxford-Nanopore platforms.
- Bioinformatics software development to support molecular and synthetic biology efforts.

- Direct written and verbal communication of findings to senior leadership and business partners.
- Database management and delivery of sequence information to molecular biology, microbiology, and chemistry groups to aid drug discovery, strain engineering, and generation of expression constructs.

Maira-Litrán Infectious Disease Lab, Brigham & Women's Hospital **03/2013–08/2015**

Research Assistant, Microbiology & Computational Biology *Boston, MA*

- Investigated *in vivo* fitness, horizontal gene transmission, and pathogenesis of *Acinetobacter baumannii*, *Staphylococcus aureus*, *Salmonella typhii*, and other virulent pathogens through microbiology, computational, and genomic techniques.
- Developed and optimized genetic tools to enable novel examinations of pathogen fitness, invasion, and virulence using high-throughput transposon-directed insertion site sequencing of infections in murine models.

Broad Institute of MIT & Harvard **01/2011–03/2013**

Research Associate II, Molecular Biology Process Development *Cambridge, MA*

- Independently designed development initiatives including supporting htNGS, microfluidics, and automation goals.
- Oversaw production and up-scaling of microbial mate-pair library construction (LC), integrated internal development with vendor technologies, and managed sample-tracking via real-time messaging to internal LIMS.
- Increased throughput of microbial LC Platform 4-fold by automation and protocol development.
- Worked extensively with mate-pair NGS LC, sequence analysis tools, genomic databases, statistical software, and programming/operating lab robotics.

Rutledge Molecular Genetics Lab, Rensselaer Polytechnic Institute **05/2010–12/2010**

Research Associate, Molecular Genetics *Troy, NY*

- Designed and developed protocols and operating procedures for transgenic *Caenorhabditis elegans* cultures to model stress-induced neural degeneration and Parkinson's Disease.

BCR Biotech **09/2009–12/2009**

Research Assistant, Microbiology *Jamestown, RI*

- Wrote and optimized protocols and methods for engineering synthetic biosensing functions in *Bacillus* spores.

Publications

Johnson, SS, **MG Chevette**, BL Ehlmann, KC Benison. 2015. "Insights from the Metagenome of an Acid Salt Lake: the Role of Biology in an Extreme Depositional Environment." *PLOS ONE*. 2015 Apr; **10**(4):e0122869.

Abstracts

Chevette, MG, DW Udway, CR Currie, SS Johnson. Functional Classification and Secondary Metabolism of an Extreme Metagenome. Poster at: 29th Annual Kenneth B. Raper Symposium on Microbial Research; Madison, WI, MA; Sep 1, 2015.

Chevette, MG, BL Ehlmann, KC Benison, SS Johnson. Microbial Diversity and Biosynthetic Potential of an Extreme Sediment Metagenome. Poster at: Gordon Applied and Environmental Microbiology; South Madley, MA; Jul 12-17, 2015.

Chevette, MG, M Vinacur, T Maira-Litrán. Transposon-Directed Insertion Site Sequencing Reveals *in vivo* Fitness Factors in *A. baumannii* Lung Infections. Poster at: Boston Bacterial Meeting; Cambridge, MA; Jun 18-19, 2015.

Udwary, DW, K Robison, **MG Chevette**, GL Verdine. Lessons from Long Read Assembly of 100+ Actinomycete Genomes. Poster at: Gordon Marine Natural Products; Ventura, CA; Mar 2-7, 2014.

Robison, K, DW Udwary, **MG Chevette**, GL Verdine. Long Read Assembly of >100 Actinomycete Genomes. Poster at: Advances in Genome Biology & Technology; Marco Island, FL; Feb 12-15, 2014.

Young, S, S Steelman, R Daza, **MG Chevette**, R Lintner, S Gnerre, A Berlin, B Walker, C Nusbaum, R Nicol. Generation of High-quality Draft Assemblies with a Single Sequencing Library. Poster at: Sequencing, Finishing, Analysis in the Future; Santa Fe, NM; May 29-31, 2013.

Steeleman, S, R Daza, **MG Chevette**, P Kompella, P Trang, T Surabian, R Lintner, CZ Zhang, J Jung, M Meyerson, C Nusbaum, R Nicol. Automated Low Input Mate-Pair Library Construction for Illumina Sequencing. Poster at: Advances in Genome Biology & Technology; Marco Island, FL; Feb 15-18, 2012.

Steeleman, S, R Daza, **MG Chevette**, P Kompella, P Trang, T Surabian, R Lintner, R Nicol. Microbial Mate-Pair Library Construction for de novo Detection of Structural Rearrangements. Poster at: Broad Institute Retreat; Boston, MA; Nov 7-8, 2011.

Achievements & Awards

Dean's Academic Achievement Award <i>Harvard University Extension</i>	03/2015
Featured Scientific Researcher – "Who is Broad?" <i>Broad Institute of MIT & Harvard</i>	01/2012
Rensselaer Alumni Scholarship <i>Rensselaer Polytechnic Institute</i>	2004–2008
Sal H. Alfiero Scholarship <i>Rensselaer Polytechnic Institute</i>	2004–2008
Rhode Island State Scholarship <i>Rensselaer Polytechnic Institute</i>	2004–2008

Service & Outreach

Co-organizer – Discovery Niche <i>Wisconsin Institutes for Discovery</i>	10/2015-11/2015
<ul style="list-style-type: none"> Planned, built, and maintained interactive public exhibits showcasing natural products drug discovery and bioenergy research for the Wisconsin Science Festival and the University of Wisconsin community. 	
Open Genomics Advisor <i>Long Now Foundation – Revive & Restore</i>	04/2014–03/2015
<ul style="list-style-type: none"> Advised projects with Revive and Restore and Cofactor Genomics seeking to understand the genomics of the endangered and extremely bottlenecked black footed ferret and the extinct heath hen in an effort to reintroduce genetic diversity and aid in restoration of healthy wild populations. 	
Environmental, Health, and Safety Representative <i>Broad Institute of MIT & Harvard</i>	01/2011–03/2013
